Tune into the Moon

Gardening with the Moon

and lots of cake

WELCOME TO THE 24th YEAR OF THE ASTRO CALENDAR

The Sun takes a whole year to cycle the 12 signs of the Zodiac, the Moon moves very quickly, spending roughly two and a half days in each sign, taking around 28 days to circumnavigate the zodiac. We all know about the Moon's effects on the tide and on the biological rhythms of plant and animal life but the Moon also effects us on an emotional level and as it moves through the astrological signs we all of us feel its effect. Each phase of the Moon is associated with a particular power or purpose and watching it's daily rhythm can enhance and guide us during the month, expanding our perception of clock time with an appreciation for cosmic time.
