### Internet Security Guide

- \* Always click everything – it might be funny or interesting! They wouldn't email it to you if it wasn't important...
- \* Microsoft work hard creating secure environments – use them!
- \* You may, from time to time, receive special offers, commonly called “Spam” These are the best deals from all over the net just for you! Check it out.
- \* The Internet is full of free bits and pieces such as Gator, BonzaiBuddy and Weatherbug. These will help you make your way around the net and are recommended for every net user. See [tucows.com](http://tucows.com) for more!
- \* Top tip! Running a firewall can slow down your internet connection to a crawl Turn it off! You'll have more fun.
- \* Get KaZaA! You can download free software called “warez” which can save you time and money. You can also get free music called “empeethreez” - never buy another CD again!
- \* Sick of annoying dialogues asking you complex questions you don't understand? Change Internet Explorer's security level to “Low” and never get bugged again.
- \* Click popups – you might miss a special offer on spy cameras or child pornography if you don't.
- \* Check out foreign number autodiallers – You only have to stay dialled up while you whack off, saving you money in the long run.
